I claim, a new differential having:

- 1. a pinion differential incorporated with planetary gearing.
- 2. Inew differential having: a pinion differential incorporated with planetary gearing, the planetary gearing having a rotatable case/fixture of it's own.
- 3. a new differential having: a pinion differential incorporated with planetary gearing, the planetary gearing having a rotatable case/fixture of it's own, the said case being stationary/fixed to one of the axle bevel gears.
